

# SMART SUCTION UNDER CONTROL WITH CATTANI'S SMART APP

SmartApp is the Cattani App that allows you to control Micro Smart and Turbo Smart Suction Systems directly from your smart phone or tablet.

As of **1st April 2022** it was required that all Cattani Smart suction systems be registered on the SmartApp to comply with the units warranty.

## BENEFITS OF REGISTRATION:

**Engineering company is alerted to upcoming servicing requirements,** servicing your unit yearly is also a requirement of the warranty.

**Engineers can remotely check and diagnose any errors should they occur** on all Smart suction systems.

**Check the status** of your Cattani suction systems which are present in your practice.

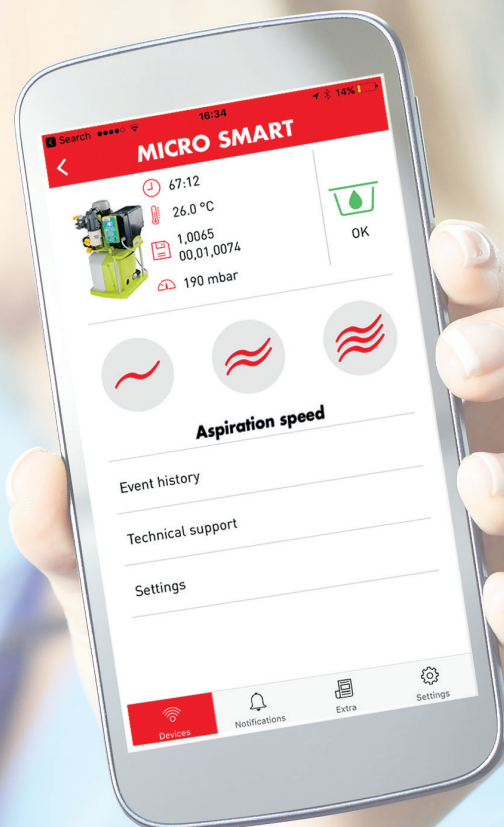

**Check and adjust the suction level** depending on whether you are carrying out conservation, orthodontic, oral or implantology procedures.

**Check the amalgam container** - the unit will alarm when the container is at 95% and 100% full.

**Check the event list** for any alarms.

**Send a report** to Cattani Italy and UK with details about the suction system for further technical assistance.

For further information please email [info@cattaniesam.co.uk](mailto:info@cattaniesam.co.uk).

## HOW IS IT WE LEAD IN OUR FIELD, WHEN WE COST LESS THAN THE ALTERNATIVES?

THIS IS HOW:

**Constant research:** this lets us apply the latest technology in all of our products and solutions.

**We enhance performance:** electronic and information technology allow us to increase the performance and reliability of our products.

**We reduce costs:** less maintenance and energy costs mean on a cost-benefit analysis we are always the most economical.

**We reduce environmental impact:** we save 50% on raw materials in the production stage and our customers save between 30% and 50% on electrical consumption thanks to inverter drive technology.
